WHEAT MARKETING CENTER

PRESENTS:

Asian Noodle Technology and Ingredient Application

A hands-on course in improving noodle quality by optimizing flour and functional ingredients

Portland, Oregon

Asian Noodle Technology and Ingredient Application

COURSE PARTICIPANTS WILL:

- ❖ Use WMC's pilot-scale noodle line to manufacture:
 - Yakisoba noodles
 - Parboiled wet noodles
 - White salted noodles
 - Instant ramen noodles
 - Wonton wraps
- ❖ Rate the process performance of noodles made from different types of flours and functional ingredients
- ❖ Evaluate finished product attributes for texture, color, and cooking quality
- ❖ Understand the effects of flour and functional ingredients on noodle quality
- ❖ Experiment with new healthy noodle products, such as:
 - Whole wheat noodles
 - High fiber noodles

Accurate ingredient measurement is essential.

Understand the process of noodle making gets very exciting!

Checking dough as it moves through the noodle line.

An enjoyable lesson in wonton making!

Participants are able to use equipment to get a complete evaluation of noodles.
